EDUCATION

VISVESVARAYA TECHNOLOGICAL UNIVERSITY - BIET Bengaluru, India
Bachelor of Engineering in Electrical and Electronics Graduated: June 2021

PROFESSIONAL SUMMARY

AWS Certified DevOps Engineer with 3.5+ years of experience managing cloud infrastructure for 100+ enterprise applications. Achieved 40% faster deployments by architecting CI/CD pipelines using GitHub Actions and Jenkins. Lowered infrastructure costs by 25% through auto-scaling optimization. Maintained 99.9% uptime for production systems serving 50,000+ users. Expert in AWS (EC2, S3, Lambda, EKS, VPC, IAM), Terraform, Ansible, Docker, Kubernetes, and observability tools (Datadog, Prometheus, Grafana).

WORK EXPERIENCE

THOMSON REUTERS Bengaluru, India
DevOps Engineer *Dec 2022 - Present*

CI/CD Pipeline Development & Build Automation

- Designed and maintained CI/CD pipelines for 100+ enterprise applications using GitHub Actions, cutting deployment time by 40% and supporting 500+ monthly releases.
- Architected 25+ reusable composite actions and workflow templates, standardizing CI/CD practices across 15+ teams and shortening pipeline setup time by 60%.
- Managed 50+ self-hosted runners on Linux (RHEL, Ubuntu) and Windows servers, implementing auto-scaling that cut infrastructure costs by 25%.
- Improved build performance by 35% through matrix builds, parallel job execution, and dependency caching, saving 200+ developer hours monthly.
- Integrated Snyk security scanning into 100+ pipelines, identifying and remediating 500+ vulnerabilities before production deployment.

AWS Cloud Infrastructure & Kubernetes

- Deployed and managed 30+ containerized microservices on Amazon EKS clusters using Helm charts and ArgoCD, achieving 99.9% deployment success rate.
- Provisioned AWS infrastructure for 20+ projects including 100+ EC2 instances, 50+ S3 buckets, and 15+ RDS databases using Terraform, slashing provisioning time by 70%.
- Configured AWS Secrets Manager for 200+ secrets across 50+ applications, eliminating hardcoded credentials and minimizing security incidents by 90%.
- Designed VPC architecture with 10+ subnets, security groups, and NAT gateways, improving network security compliance by 100%.
- Administered F5 BIG-IP load balancers handling 1M+ daily requests with zero-downtime deployments across 3 environments.

Observability, Monitoring & Site Reliability

- Built observability platform using Datadog with 50+ custom dashboards and 200+ alerts integrated with PagerDuty, shortening incident detection time by 60%.
- Defined and monitored 30+ SLIs and SLOs with error budgets, improving service reliability from 99.5% to 99.9% uptime (4x decrease in downtime).
- Responded to 100+ P1/P2 production incidents during 24/7 on-call rotations, maintaining 95% SLA adherence.
- Conducted 50+ Root Cause Analysis (RCA) reviews, implementing fixes that decreased Mean Time to Resolution (MTTR) by 40%.

Infrastructure Automation & Operations

- Automated infrastructure provisioning using 30+ Terraform modules and 20+ Ansible playbooks, eliminating 80% of manual configuration.
- Managed 500+ ServiceNow tickets including Incidents, Change Requests, and RITMs with 98% on-time resolution rate.
- Executed monthly vulnerability scans using Snyk and Veracode, remediating 1000+ security findings across 50+ enterprise servers.
- Optimized artifact management in JFrog Artifactory, implementing retention policies that trimmed storage costs by 30%.

PROJECTS

Universal Patch Scheduler - Automated Server Patching Platform

Tech Stack: Python, Ansible, Terraform, AWS Lambda, CloudWatch, SNS

- Architected intelligent patching framework automating 200+ server patches monthly across Production, UAT, and QA environments.
- Orchestrated multi-phase workflows cutting patching window from 4 hours to 45 minutes (80% improvement).
- Implemented distributed task management achieving 99.9% patch success rate with zero duplicate notifications.
- Eliminated 80% of manual coordination effort, saving 40+ engineering hours per month.

Enterprise CI/CD Platform

Tech Stack: GitHub Actions, Jenkins, Docker, Kubernetes, ArgoCD, Terraform

- Built centralized CI/CD platform serving 100+ applications, 15+ teams, and 200+ developers organization-wide.
- Developed shared workflow library with 50+ reusable actions, shortening new project onboarding from 2 days to 2 hours.
- Achieved 40% faster deployment cycles, enabling 3x increase in release frequency (from weekly to daily releases).

CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate (SAA-C03)** - July 2025
- **Java Full Stack Development Certification** - September 2022

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS), EC2, S3, VPC, Lambda, Route53, SNS, SQS, IAM, Secrets Manager, Auto Scaling, CloudWatch, ELB, ALB, EKS, ECR, RDS, CloudFormation

Infrastructure as Code: Terraform, Ansible, AWS CloudFormation, AWS CLI, Infrastructure Automation, Configuration Management

CI/CD & Automation: GitHub Actions, Jenkins, AWS CodePipeline, CodeBuild, ArgoCD, GitLab CI, GitOps, Self-Hosted Runners, Build Automation

Containers & Orchestration: Docker, Kubernetes, Helm, Amazon EKS, Amazon ECR, Microservices Architecture, Container Security

Observability & Monitoring: Datadog, CloudWatch, Prometheus, Grafana, PagerDuty, ELK Stack, SLIs, SLOs, APM, Alerting

Networking & Security: F5 BIG-IP, AWS ELB/ALB, VPC, Security Groups, IAM Policies, SSL/TLS, Snyk, Veracode, DevSecOps

Artifact Management: JFrog Artifactory, Nexus Repository, AWS S3, ECR, GitHub Packages, Maven, npm

ITSM & Collaboration: ServiceNow, CMDB, ITIL, Jira, Confluence, Slack, Agile, Scrum, Incident Management

Scripting & Programming: Python, Bash, Shell Scripting, PowerShell, YAML, JSON, Java, REST APIs, Git

Operating Systems: Linux (RHEL, Ubuntu, CentOS, Amazon Linux), Windows Server, SSH
